ORDERING INFORMATION

Cable Pricing

Speaker cables and interconnects are priced per pair, while power cables and digital cables are priced per cable. All cables are priced at a standard length, as indicated per model. Additional length can be added at an extra cost per 0.25 meter. Cables shorter than the standard length are priced the same as the standard length cables.

Speaker Cables

When ordering speaker cables, terminations must be selected for each speaker cable order. Two terminations are required: one for the amplifier end and one for the speaker end. For bi-wire speaker cables, three terminations are necessary: one for the amplifier end and two for the speaker end. Please ensure that all terminations are specified to avoid any delays in your order.

Phono Cables

Shunyata Research phono cables include a pair of single-ended (RCA) cables with a matched ground cable with multi-spade terminations. When ordering phono cables, please indicate terminations for both the source and destination ends of the ground cable. Available termination options include combo spade (brass), small spade (copper), medium spade (copper). See page 9 for more information.

USB and Ethernet Cables

When ordering USB and Ethernet cables, the minimum length is 1.5 meters, and the maximum length for USB is 5 meters.

Power Distributors

Shunyata Research power distributors do NOT ship with a power cable, except where noted. All power distributors, except for the Gemini Model-4, have a C20 power inlet. Therefore, a C19 power cable must be ordered for each power distributor.

GENERAL INFORMATION

Shipping Policy

All products ship F.O.B. from Poulsbo, WA. Shipping costs are the responsibility of the dealer/distributor. Products are shipped via UPS unless otherwise specified. Shunyata Research does not drop-ship products except under prearranged agreements. Please contact the factory directly for more information regarding drop shipments.

Transshipping

Shunyata Research understands that dealers and distributors have made a significant investment in their respective regional markets. Transshipping, or shipping products into the market of another established dealer, is strictly forbidden.

Warranty

Shunyata Research offers Limited Warranties to the original purchaser for products purchased in the US and Canada. For further details regarding product warranties, please see the accompanying warranty sheet included in the product packaging or contact Shunyata Research directly. Warranties outside of the US and Canada are covered by the respective distributor for that country. Shunyata Research will provide support to the distributor for warranty issues.

Service

Shunyata Research builds products to withstand years of usage, but we realize that sometimes a product may need servicing. Please contact Shunyata Customer Service to request an RMA (Return Merchandise Authorization). Please have the product model, serial number, and purchase details available.

You must obtain an RMA before returning any product to the factory.

Note: Due to stringent manufacturing processes and proprietary assembly techniques, Shunyata Research products are not field-serviceable. Shunyata Research does not authorize servicing of its products by any third parties. Any attempts to service or alter a Shunyata Research product will void any and all warranties.

Upgrades

From time to time, Shunyata Research may offer product upgrades that will require the return of the product to the factory. Please contact Customer Service for further information and instructions regarding specific product upgrades. Shipping (both ways) for all factory-performed upgrades is the responsibility of the owner.

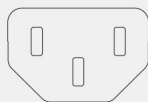

You must obtain an RMA before returning any product to the factory.

Advertising

Any Shunyata Research product advertised or published in print or online must always be priced at MSRP. Any items that are discounted or discontinued may not be advertised at a price below MSRP without prior permission from Shunyata Research.

NR and QR Reference Series power cables reduce power line noise.

XC Performance Series power cables are specifically designed for Shunyata Research power distributors.

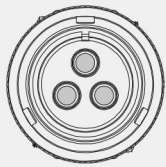

The standard color theme for the Alpha-X and Sigma-X models is black with charcoal carbon.

The standard color theme for the Omega-X is grey with silver carbon.

Phono cables include a pair of single-ended (RCA) cables with a ground cable, or optional CGC cable, featuring multi-spade terminations. When ordering phono cables, please indicate terminations for both the source and destination ends of the ground cable. Available termination options include: combo spade (brass), small spade (copper), medium spade, banana (gold).

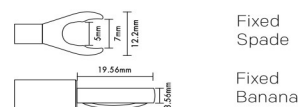

SPEAKER TERMINATIONS

When ordering speaker cables, select one termination for the amplifier end and one for the speaker end. For bi-wire cables, select two terminations for the speaker end, and for tri-wire cables, select three. We offer a variety of terminal options, including our STIS™ v3 interchangeable system, as well as fixed terminals in pure OFE copper or gold-plated OFE copper. *Note that pure, non-plated copper terminals require occasional cleaning, while gold-plated terminals are maintenance-free.* Ensure all terminations are specified to avoid order delays.
